Healthy people means healthy business

The Chandra Massage

The chandra massage is a back, shoulder, head and scalp treatment using an energising or rebalancing oil to ease muscle tension, concentrating on tight and stressed muscles. Performed in a special chair the massage is a fusion of East meets West; combining traditional acupressure massage with a variety of massage techniques. It is an intensive powerful treatment that will relax and de-stress you, but also leaves you feeling energised and revitalised. Walking away you actually feel taller and lighter.
